25 *Years Of*
Experience

We bring the technical knowledge & experience

Vilz Concreting & Excavation is a family-owned and operated concrete company based in Sydney.

About Us

Vilz Concreting & Excavation is a family-owned and operated concrete company based in Sydney. Hard working and reliable – we are committed to delivering an exceptional level of service. We have the skills, experience, knowledge and equipment to get your concreting job done on time and on budget. We've been delivering residential and commercial concreting projects in Sydney and across the Greater Sydney region for over 25 years. We've built a reputation for being trusted and reliable. We are concrete specialists you can count on.

Services

RESIDENTIAL CONCRETING

Building or renovating involves making choices. Lots of them. But choosing a material for your driveway is easy. Concrete is an affordable luxury that can add value to your property.

INDUSTRIAL CONCRETING

VILZ Concreting has the skills, reliable equipment and local knowledge to help build your next commercial project. We've done jobs for councils, government departments, private builders, construction companies, architects and contractors. We have the resources to get your job done on time.

COMMERCIAL CONCRETING

We've worked on lots of different commercial concreting projects around Sydney over the past 15 years, including school and shopping centre car parks, access ramps and factory slabs. Check out our project gallery if you'd like to know more about the type of work we do.

EXCAVATION

Vilz Concreting And Excavation Pty Ltd land clearing and landfill services offer our clients the easiest and quickest way to clear out large blocks to make way for new construction projects. Whilst some companies only offer their services to a select group – we offer ours to private individuals, companies, contractors, transportation providers, property developers, as well as different agencies. So whether you need one block cleared for your new house or acres for a new manufacturing plant, we have the machinery and expertise that's required.
